	Change sharing options for different network profiles	
<u> </u>	Windows creates a separate network profile for each network you use. You can choose specific options for each profile.	
	Private (current profile)	
	Network discovery	
	When network discovery is on, this computer can see other network computers and devices and is visible to other network computers.	
	 ● Turn on network discovery ● Turn on automatic setup of network connected devices. ○ Turn off network discovery 	
	File and printer sharing	
	When file and printer sharing is on, files and printers that you have shared from this computer can be accessed by people on the network.	
	Turn on file and printer sharing	
	O Turn off file and printer sharing	
	HomeGroup connections	
	Typically, Windows manages the connections to other homegroup computers. But if you have the same user accounts and passwords on all of your computers, you can have HomeGroup use your account instead.	
	 Allow Windows to manage homegroup connections (recommended) Use user accounts and passwords to connect to other computers 	
	Guest or Public (v)	
	Ŭ	
		1.0
L L	Public folder sharing	
·	When Public folder sharing is on, people on the network, including homegroup members, can access files in the Public folders.	
	Turn on sharing so anyone with network access can read and write files in the Public folders	
	 Turn off Public folder sharing (people logged on to this computer can still access these folders) 	
	Media streaming	
	When media streaming is on, people and devices on the network can access pictures, music, and videos on this computer. This computer can also find media on the network.	
	Choose media streaming options	
	File sharing connections	
	Windows uses 128-bit encryption to help protect file sharing connections. Some devices don't support 128-bit encryption and must use 40- or 56-bit encryption.	
	• Use 128-bit encryption to help protect file sharing connections (recommended)	
	Password protected sharing	
	When password protected sharing is on, only people who have a user account and password on this computer can access shared files, printers attached to this computer, and the Public folders. To give <u>other people access, you must turn off password protected</u> sharing.	
	○ Turn on password protected sharing	
	Turn off password protected sharing	~
	Save changes Cancel	

สร้างบัญขีผู้ใช้ใหม่ (Create New Account) โดยใช้ชื่อ scan โดยใส่ password ที่จำได้ง่ายเช่น ``1234″ หรือในบางเครื่องที่ไม่มีการสร้าง user และpassword เราสามารถใส่ชื่อ user ว่า administrator โดยไม่ต้องใส่ password

สร้างโฟลเดอร์ชื่อ scan แล้วทำ File Sharing และ Permission for Share folder

็จากตัวอย่างสร้างโฟลเดอร์ชื่อ scan แล้วจึงแชร์โดยใช้ชื่อ scan จากนั้นจึงให้สิทธิ์ อ่าน/เขียน กับผู้ใช้ทุกคน (Everyone Read/Write)

สร้างปุ่ม Address ที่หน้าเครื่องถ่าย โดยในขั้นตอนนี้ผมสร้างโดยการใช้ RUI จากweb browser เพื่อสร้างปุ่ม Address จากหน้าจอคอมพิวเตอร์ได้เลย
